Know more about *Eurasia reg'd* puppies temperament...

5 week old Finnish Lapphund puppies meeting Tequila, a Red Lored Amazone

Dear future *Eurasia's* puppy owner,

Most of the dogs in North America today are first and foremost family companions, a fact which seems to have been largely ignored by breeders of show dogs!

Eurasia's puppies are known to be friendly with people and excellent companions. I invested lot of time and effort to well structure a socialization and educational program for all my puppies. This program is built to maximize their behaviour development and stability. As a dog trainer since 1987, it is highly important for me to produce healthy puppies in both mind and body. It is my goal to provide future owners with friendly trustable companions to share their family life.

When time comes to choose your puppy, I do it very carefully. I revise the answers you gave me in the future buyer questionnaire and take a look at your preferences of sex and color(s). I also revise observations I wrote and verify them with temperament tests. Then I match the best puppy to the best possible family.

Olivier sleeping with a 3 week old Eurasier puppy... They are so cute!

To achieve this work, I use at least three different temperament tests. These tests are done in three different 'strange' environments (unknown by the puppies) at the age of five and seven weeks.

These tests are always conducted by experienced dog behaviour people. Because of these temperament tests, no choice of puppies will be done prior seven weeks of age.

Eurasia's trademark is temperament... and it did not happen by chance!
